UNDP creates AI platform to support local businesses in Zanzibar

13 July 2026 | UN Interviews

Download

On the Tanzanian archipelago of Zanzibar, the Government challenge: they relied on surveys conducted only once per respond to travelers' needs.

Following conversations with the Tanzanian government and grow the tourism industry, the UN Development Programme called Jozani AI – named after a national forest in Zanzibar government and local businesses to make more informed.

That's just one example of how, even as the UN works to create a framework for artificial intelligence, it is also using the technology challenges and improve people's lives.

The UNDP's Deputy Resident Representative in Tanzania is helping local businesses to make more informed.

UN News' Isaiiah Steinberg asked him how Jozani AI is helping
